Projects

Appcircle, Mobile Devops Tool

- As a DevOps engineer in Appcircle, I am responsible for deploying the self-hosted containerized micro service Appcircle app on customer infrastructures.

Medionam, Ilus Software Devops Engineer

- As a DevOps Engineer for the Medionam project, I was responsible for managing the infrastructure using Terraform, with a strong focus on ensuring the highest levels of security, availability, scalability, and serverless architecture with Google Cloud, which was working with Cloud SQL
- I utilized Gitlab and Gitlab Pipelines to automate and streamline the continuous integration and delivery process, ensuring a smooth and efficient deployment pipeline.

Personal Infra, Personal Project

- Personal Infra is a Terraform module and code repository that I use to manage my infrastructure and testing activities on Amazon Web Services.
- With this project, I have taken great care to ensure that it follows GitOps best practices and is integrated with Terraform Cloud for seamless management.

Coineus, Personal Project

- As the DevOps lead for Coineus, I managed the deployment and maintenance of the web applications, Frontend, Server, and Price-Service, as well as the Postgres database, on Kubernetes.
- I utilized various technologies such as Multi-Branch Jenkins, Docker, Kubernetes, Nginx Web Server, and Nginx Ingress Controller to enhance my skills and successfully deploy the applications.
